56HP-92 (Windows® Internal Modem)

SMART ONE 56K V.92/V.44 WINDOWS® MODEM

Introducing the V.92 Windows® Internal Modem. This 56k modem is designed to work exclusively with the Windows® Operating System and provide outstanding value and reliable operations at an affordable price. It supports the new standard V.92 technology as well as V.44 compression. This is in addition to V.90 technology currently supported by all Internet service providers. That means it's fast, easy to install and use. With the V.92 56K modem you get it all! Faster Web browsing. Faster Internet Access. Faster connect speeds. Take phone calls while online.

The V.92 standard introduces new features like Quickconnect™ which reduces the start-up time required to establish a connection. This makes getting on and off the Internet a breeze. You don't have to wait 20 seconds or more while your modem connects. Quickconnect™ works with your Internet service provider's central site equipment to cut the connect time by 50% or more. Now you also get faster download speeds with V.44/6:1 compression delivering up to 25% more through put. This ITU-T standard compression algorithm downloads files, graphics and video faster from the Internet.

Now you can receive phone calls while online and put the Internet-on-hold! With Internet call-waiting you will never miss a phone call. V.92 has a standard method of disconnecting the modem long enough to let you know that someone is trying to call you without losing the connection. There is no longer a need for a separate modem line.

KEY NEW FEATURES

Increased speeds and added convenience

Connect Faster: Quickconnect™ reduces the start-up time required to establish a connection. Cut your connect time by up to 40% or more.

Download Faster: New V.44 compression delivers up to 40% more throughput for HTML documents and pages.

Internet Call-Waiting: Modem-on-Hold allows you to receive an incoming call and stay connected to the Internet. (Call-Waiting service from your phone company is all that is required.)

THE MODEM

Link to the world with the latest technology and fastest transmission rates available

56Kbps V.92 Internet Download, 44Kbps Operation

V.44, V.42bis/MNP 5 data compression & V.42/MNP 2-4 error correction protects your data transmission

MNP 10 reliable connections under adverse line and cellular conditions

FAX SYSTEM

High-speed operation makes faxing directly from your computer the most cost-efficient and convenient way to fax documents anywhere in the world

Fax Broadcasting: Send faxes to multiple locations

Fax Scheduling: Take advantage of lower phone rates

Fax Merging: Combine documents from different applications into one fax

Multiple fax phone lists
