

SMART ONE 56Kbps MAC USB V.92 Controller-based DATA/FAX MODEM

Introducing the Smart One 56K USB Plus External Controller-based modem. This 56k USB modem is designed to work with Microsoft Windows 98, ME, 2000, XP, MAC OS 9.X and above systems to deliver the fastest speeds possible and additional features like QuickConnect™ and Internet Call-Waiting. (Internet Call waiting drivers and application for Windows 2000 and XP only). The Smart One™ modem supports all the new standard V.92 features with the exception of PCM upstream. This is in addition to V.90 technology currently supported by all Internet service providers. That means it's fast, easy to install and use. With the 56USB Plus modem you get it all! Faster Web browsing, faster internet access. Take phone calls while online (Windows 2000 and XP only).

KEY NEW FEATURES

- Universal Serial Bus (USB) delivers the fastest and most convenient hook-up for both PC and Macintosh computers, you don't even have to shut off your computer.
- Connect Faster: Quickconnect reduces the start-up time required to establish a connection. Cut your connect time by up to 40% or more.
- Download Faster: New V.44 compression delivers up to 40% more throughput for HTML documents and pages.
- Internet Call-Waiting: Modem-on-Hold allows you to receive an incoming call and stay connected to the Internet. (Internet Call waiting drivers and application for Windows 2000 and XP only. Call-Waiting service from your phone company is required.)
- Controller-based Modem delivers the reliability of a hardware-based connection with using your PC's processor.

FAX FEATURES (With the included fax software)

- Fax Broadcasting: Send out faxes to multiple locations
- Fax Scheduling: Take advantage of low phone rates
- Fax Merging: Combine documents from a different application into one fax
- Multiple fax phone list
